

On January 21st, the Redistricting Committee met for a final review of the remaining four options and conclude if any additional viable options could be developed at this time. After hours of discussion in preparation for the public hearing, the committee adjourned and is in the process of preparing and finalizing data for the presentation. Many of the plans being developed are similar and build off of each other, and thus would be better understood with an explanation and walk through of the process. With that said, while it was the committee's initial goal to have the information on the options available on the website for the community to review prior to the public hearing, scheduled for **Tuesday, January 27, at 7 p.m. at the North Andover High School**, it is the opinion of the committee to post the information after the public hearing once it is complete and finalized, with explanations to avoid confusion and any misinterpretations. As with all stages in this process, the input from the community is a critical and important part of this process, and therefore, once presented and posted, we welcome and encourage input or suggestions. The Redistricting Committee met on January 13th to review the nine options. As a result of the Committee's work last evening, 5 options were eliminated from further consideration. The committee continues to analyze and validate the numbers on the remaining four options. Once finalized, the options will be posted on the North Andover School Website. The Committee's goal is to have the information available on the website for the community to review prior to the public hearing.

The Redistricting Committee met on January 5th to review four options that had been developed. A subcommittee met again on January 8th to confirm data and continue analyzing the initial proposal of four options. Through the evolution of the initial four options, the Committee is now confirming data and analyzing nine options.
